

Convenient see-through pipe helps identify when to purge a LAKOS Separator

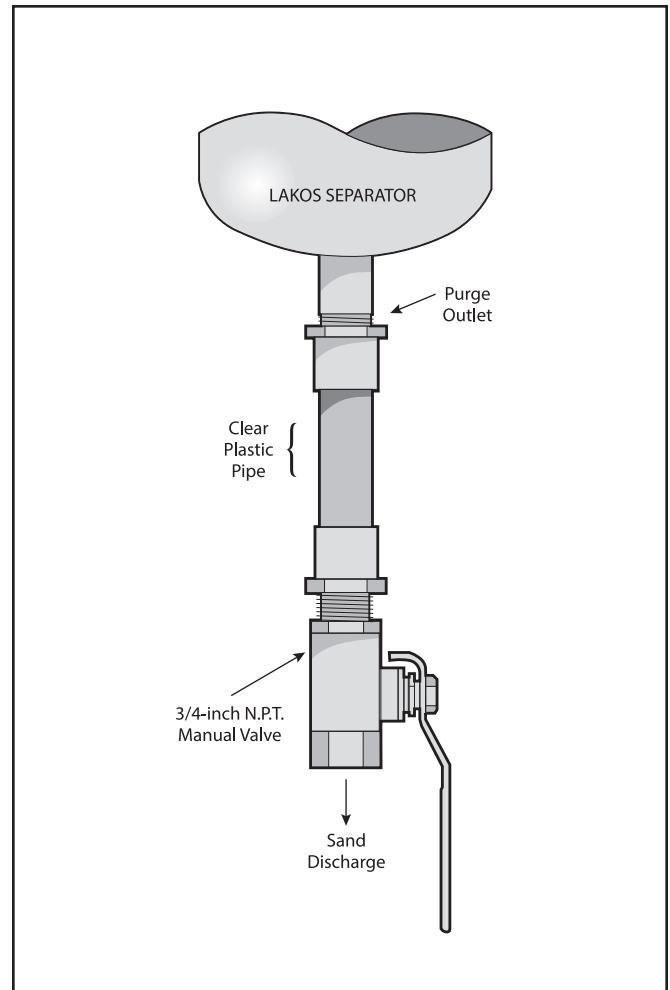

This assembly includes a durable manual valve and a length of clear plastic pipe with the proper fittings for installing directly onto the purge connection of a LAKOS Sand Separator.

Be sure to purge regularly in order to avoid compacted build-up of sand in the separator's collection chamber. Consult LAKOS for automatic purging options.

Installation

Use sealant tape on all threaded connections. Attach the see-through pipe end of the Visual Purge Kit onto the purge outlet of the separator. The manual valve should be below the see-through pipe section.

Use caution when purging to avoid excessive torque on the see-through pipe and connection to the separator.

Lakos Separators are manufactured and sold under one or more of the following U.S. Patents: 5,320,747; 5,338,341; 5,368,735; 5,425,876; 5,571,416; 5,578,203; 5,622,545; 5,653,874; 5,894,995; 6,090,276; 6,143,175; 6,167,960; 6,202,543; 7,000,782; 7,032,760 and corresponding foreign patents, other U.S. and foreign patents pending.
